The new vessels will operate on additional routes in Kenya and on new routes in Tanzania and Uganda. InfraCo Africa's investment will support the construction of five new fifth-generation ferries over the next 24-36 months and will enable the company to finance upgrades to its existing boatyard located in Kisumu, Kenya. The company currently has one further ferry under construction.

InfraCo Africa, a dedicated investment arm, to support the expansion of the company's Waterbus passenger transport operations on Lake Victoria. Waterbus is a member of the Keolis consortium which was awarded the Waterbus service contract in 2017. The contract includes the construction of five new fifth-generation ferries with capacity for 180 passengers and 40 small vehicles.

Waterbus operates two 132-seater and one 80 seater safe, modern catamaran vessels for passengers and light cargo operations on Lake Victoria.

The company is working on an expansion project that will enable them to double the number of Waterbus crossings on two Kenyan routes. The company currently has one further ferry under construction.

InfraCo Africa is a private equity firm that invests in the development of high-quality infrastructure projects in Africa and Asia. It is an affiliate of InfraCo Asia, a dedicated investment arm of the Overseas Private Investment Corporation (OPIC), the US government's development finance institution. InfraCo Asia invests in a wide range of infrastructure projects across Asia, with a focus on transport, energy, and other critical services.

The Khmer Cold Chain Company, an initiative by InfraCo Asia together with Phnom Penh Autonomous Port, and other esteemed guests.

The ceremony was supported by government representatives from the Kingdom of Cambodia.

The event also included a visit to the new Tram Khnar water treatment facility in Souphi Commune, Cambodia, which is part of the company's water supply infrastructure development in Cambodia.

InfraCo Asia CEO Allard Nooy was featured in article by Infrastructure Investor titled 'Vietnam's bid to displace diesel and ensuring food security for farmers facing the challenges of climate change. You can watch the videos here in English.
